

Bi-Fold Bed Frame

The BI-FOLD BED FRAME is safely counter-balanced and is housed inside a bed cabinet with bi-fold doors for easy and quick access. All Murphy-style frames include a 2" foundation at no extra charge.

This standard frame is available in all bed sizes and can use standard mattresses of 9" thickness or less.

Bi-Fold or Panel Style

Panel Bed Frame

When using the PANEL BED FRAME, the front panel of the bed cabinet becomes the foundation platform for the bed when pulled down into the sleeping position. Bi-fold doors are not required.

Panel bed frames are available in all bed sizes and use standard mattresses.

Bi-fold and panel bed cabinetry look virtually alike when in the closed position.
